Yamaha EX Power Filter Kit

RY13100

Applications: Yamaha EX and EXR Models 2017 -

Approximate Installation Time: 2.0 Hrs.

Recommended Specialty Tools:

None

Part #

N/A

Required Materials:

Red loctite

Part #

N/A

We strongly recommend the use of a service manual to familiarize yourself with the various components and procedures involved with this installation. Please note that some of the original hardware removed in the disassembly process will be used in the installation process. These instructions have been written in step-by-step format and refer to illustrations. Read through instructions entirely before performing installation. Please follow these step-by-step instructions and illustrations carefully.

***** ALLOW ENGINE TO COOL COMPLETELY BEFORE PERFORMING INSTALLATION *****

RY13100 EX/ EXR Power Filter Kit

COMPONENT LIST

		QUANTITY	PART NUMBER	DESCRIPTION
A	<input type="checkbox"/>	1		Intake Duct
B	<input type="checkbox"/>	1	RK13090-2	Flame Arrestor/ Filter
C	<input type="checkbox"/>	1	RY15-04/2.75R	Silicone Reducer Coupler
D	<input type="checkbox"/>	2	203BL064-04	Hose Clamp
E	<input type="checkbox"/>	4	QCA-RY13100-SP	Spacer Collar
F	<input type="checkbox"/>	4		6 x 18mm Flat Washers
G	<input type="checkbox"/>	4		6 X 30mm SS SHC Screw
H	<input type="checkbox"/>	11		6mm Flat Washer
I	<input type="checkbox"/>	7		6mm Nyloc Nut
J	<input type="checkbox"/>	2		6 x 20mm SHC Screw
K	<input type="checkbox"/>	4		8 x 20mm Hex Head Bolt
L	<input type="checkbox"/>	5		8mm Lock Washer
M	<input type="checkbox"/>	5		8mm Flat Washer
N	<input type="checkbox"/>	1		8 x 16mm Hex Head Bolt
O	<input type="checkbox"/>	1	5463K598	1/2" Elbow Fitting
P	<input type="checkbox"/>	1	FSM-RY13100-BMT	Intake Duct Mount Bracket
Q	<input type="checkbox"/>	1	RK13085-2480	Breather Filter with Clamp
R	<input type="checkbox"/>	1	2NPF2	Lord Mount
S	<input type="checkbox"/>	1	FSM-RY13100-BRKT	Electrical Mount Bracket
T	<input type="checkbox"/>	2	QCA-RS12050-S	6 mm Spacer

Packed with pride by: _____

Your kit was inspected and verified before being carefully packaged by our staff. Please check package contents before beginning assembly. If you have a question about missing or damaged items please contact RIVA Technical Support directly at (954) 247-0705 or by e-mail at tech_support@rivamotorsports.com

- INSTALLATION INSTRUCTIONS -

Remove seat.

Remove under seat storage trays (2).

Remove screws (2) holding L side panel. Remove L side panel. (Figure 1)

Figure 1

Repeat for R side panel.

Remove seat base screws (6) and lift off seat base. (Figure 2)

Figure 2 (Six screws, two are hidden in this view)

Press down latches (A) and remove air box lid. Cut zip tie (B). (Figure 3)

Figure 3

Cut zip ties (2) securing harness to left side of air box. (Figure 4)

Figure 4

Remove rubber strap holding fuse block and push fuse block forward off mounting studs. (Figure 5)

Figure 5

Disconnect harness plugs from fuse block and remove fuse block from hull.

ECU is mounted in rubber cushion. Pull ECU/cushion forward off mounting tabs and drop into hull. (It is not necessary to unplug ECU from harness) (Figure 6)

Figure 6

- INSTALLATION INSTRUCTIONS -

Unplug Tip Over Switch (A). Squeeze clamp and remove crankcase vent hose (B) from intake duct fitting. Loosen clamp (C) and remove intake duct (D) from air box and) throttle body. (Figure 7)

Figure 7

Cut zip ties (A) holding harness to right side of air box. Slide harness out of holder tabs (B) at bottom front of air box. Pull Starter relay and rubber mount (C) off mounting tabs and drop into hull. (Figure 8)

Figure 8

Remove bolts (4) holding air box to engine. **Note: Use caution when removing top air box bolts. Do not allow engine lift eyes to fall into hull.** There are 2 top and 2 bottom bolts. Only left side bolts are shown. Right side bolts are in similar location. (Figure 9)

Figure 9

Remove OEM air box from ski. Remove angle sensor from OEM air box. Install on supplied electrical mount bracket using 2 each supplied 6 x 20mm screws, 6mm spacers, 6 mm flat washers, and 6mm nyloc nuts. **Note: Back of sensor is marked with an arrow and "UP". Sensor must be installed with arrow pointing up.** (Figure 10)

Install fuse block onto supplied electrical mount bracket using 4 each supplied 6 x 30mm screws, collars, 6 x 18mm flat washers, 6mm flat washers and 6mm nyloc nuts. (Figures 10 and 11)

Figure 10

Figure 11

- INSTALLATION INSTRUCTIONS -

Install supplied electrical mount bracket into same location as OEM air box. Attach to engine with 4 each supplied 8 x 20mm hex head bolts, flat washers and lock washers.

Note: Top bolts also hold engine lift eyes. Install lift eyes between engine and electrical mount bracket.

Install ECU and ECU suspension onto (3) tabs on front bottom of electrical mount bracket. (Figure 12)

Figure 12 (Some parts removed for clarity)

Remove the metal U-bracket beneath the starter relay from the suspension rubber. (Figure 13)

Figure 13

Install starter relay and suspension onto (2) tabs on front bottom of electrical mounting bracket. **Note: It may be necessary to bend the tabs of the cables to ease installation onto the tabs.** (Figure 12) Use supplied zip-ties to fasten harness wires to electrical bracket. On some units it may be necessary to cut the zip ties on the main harness to allow cable connections.

Insert one leg of supplied 1/2" elbow into end of OEM breather hose. **Note: Lubricate with window cleaner to ease installation.** Secure with OEM spring clamp. Insert remaining leg of elbow through hole in top right side of electrical mount bracket. Install supplied breather filter onto elbow. **Note: Do not over-tighten clamp.** (Figure 14)

Figure 14

Assemble air intake tube as shown. **Note: Lubricate parts with window cleaner to ease installation.** Slip supplied silicone reducer coupler onto supplied intake duct and secure with supplied hose clamp. Slip supplied flame arrestor / filter onto intake duct and secure with supplied hose clamp. **Note: Do not over-tighten clamps.** Install supplied lord mount onto pipe and tighten hand tight. **Note: Apply red loctite to threads.** Install supplied mount bracket as shown using supplied 8 x 16mm bolt, flat and lock washer. **Note: Do not tighten at this time! Apply red loctite to threads.** (Figure 15)

Figure 15

Place OEM hose clamp (previously removed from OEM intake hose) onto throttle body. Insert filter /flame arrestor end of assembled intake into hull ahead of engine. Carefully push forward into space above left side of fuel tank until rear end of silicone coupler can be installed onto throttle body. **Note: take care not to get bracket or filter hooked onto cables, wires, or brackets in fuel tank bay.**

Install aft end of coupler onto front of throttle body. **Note: Lubricate throttle body and coupler with glass cleaner to ease installation. Do not tighten hose clamp yet!**

Open front storage compartment lid to fully open position. Pull lid directly away from ski to remove lid from plastic hinge.

- INSTALLATION INSTRUCTIONS -

Press in on center pin of plastic rivets with screwdriver or similar object and remove plastic rivets and storage tray.
Note: Do not push too far or center pin will fall into storage compartment.

Reach into area over fuel tank and install mount bracket onto threads of steering support bolt. Secure with supplied 6 mm nyloc nut and flat washer. (Figure 16)

Figure 16

Tighten 8mm mount bracket bolt. Tighten hose clamp on throttle body. **Note: do not over tighten clamp.**

Replace parts previously removed to access intake reversing removal procedure.

Check bilge for tools, rags, etc. Run craft on a flush kit to check for proper operation.

Remember, the water belongs to everyone.

Please ride responsibly and respect the environment!

Limited Warranty

RIVA Power Filter Kits carry a 1 year limited warranty to the original purchaser. They are warranted to be free of defects in materials and workmanship under normal use and service. Customer modified components will be void of warranty. This warranty is limited to defects in the primary components only. Finish and/or wear marks in or on primary components are not covered under this warranty.

RIVA Racing's liability is expressly limited to the repair or replacement of the components contained within or associated with this kit. RIVA Racing agrees to repair or at RIVA's option, replace any defective unit without charge, if product is returned to RIVA Racing freight prepaid within the warranty period. Any equipment returned which, in RIVA's opinion, has been subjected to misuse, abuse, overheating or accident shall not be covered by this warranty.

RIVA Racing shall have no liability for special, incidental or consequential damages or injury to persons or property from any cause arising from the sale, installation or use of this product.

No other warranty, express or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular purpose, applies. Various states do not allow for the limitation of incidental or consequential damages and therefore the above exclusion or limitation may not apply to you.

Warranty does not include the expenses related to freight or transportation of parts or compensation for any inconvenience or loss of use while being repaired. A copy of the original invoice and a Return Authorization Number (RA#) must accompany all warranty claims.

Warranted replacement parts will be returned freight collect.
